Website Concept Note

THE OPPORTUNITY & CREATIVE DIRECTION

Aesthetics:

The new website will adopt a premium infrastructure-led aesthetic, inspired by the Path Logicity logo and the idea of movement and connectivity. The existing blue/green/yellow brand palette will be evolved through deeper navy/indigo backgrounds, Logicity green and yellow accents, warm off-whites and subtle greys, moving away from an overly white interface. A contemporary sans-serif such as Inter/Manrope will create a clean, modern hierarchy, with bold, architectural headlines and concise copy. Visual language will be built around routes, grids, maps, coordinates and movement, supported by real project photography, drone footage, 3D visualisations and diagrams. Motion will be purposeful and lightweight rather than decorative.

The website should allow users to:

DISCOVER → EXPLORE → UNDERSTAND → BELIEVE → ENQUIRE

THE CORE IDEA

THE LOGIC OF MOVEMENT

Path Logicity brings together road, rail, warehousing, dry port, commercial infrastructure and sustainability into one connected ecosystem.

The website should do the same - bringing project, connectivity, solutions, proof and conversion into one seamless experience.

Pages and Tabs:

1. **Homepage**
    a. Explore Path Logicity
    b. Project Status
2. **Path group**
    a. Highlight
    b. About Path
3. **Logicity Advantage**
    a. Project at a glance
    b. Amenities
    c. Solutions

    d. PM Gati Shakti
4. **Sustainability**
    a. ESG
    b. Business Value
5. **Site Tour**
6. **News**
    a. News
    b. Media Coverage
    c. Project Updates
    d. Events
7. **Blogs**

THE HOMEPAGE EXPERIENCE

Aesthetics:

The homepage should feel cinematic, immersive and dynamic, rather than like a conventional corporate landing page. A full-screen video of the actual project/site will replace the current static hero. The navigation should sit transparently over the video and transition into a solid navy header on scroll. Large typography, minimal copy and strong visual transitions will establish scale immediately, while brand-colour sections will break up the experience and prevent the page from feeling predominantly white.

---

01 | HOME

INDIA'S LARGEST MULTIMODAL LOGISTICS HUB

A connected logistics ecosystem at Dobbaspet, Bengaluru, built to move businesses faster. (highlight the location aggressively) (We will also be using collaterals from constra as and when we need them in the website)

EXPLORE THE PROJECT | ENQUIRE LEASING NOW

The below parts to be shown as interactive icons

SCALE
400-acre integrated development

LOCATION
Strategic Dobbaspet, Bengaluru location

CONNECTIVITY
Road + Rail + Air + Ports

ECOSYSTEM
Warehousing + Dry Port + Logistics + Commercial

LEGACY
PATH Group's infrastructure experience

EXPLORE PATH LOGICITY

Introduce the project through an **interactive master plan**, allowing users to explore:

Warehousing | Rail Terminal | Dry Port/ICD | Commercial | Yards | Roads | Green Infrastructure

EXPLORE THE SITE → (this CTA will connect to the logicity edge page)

---

03 | PROJECT STATUS

WATCH THE PROJECT TAKE SHAPE

A visual progress timelapse video using Constra content showing:

Completed → In Progress → Upcoming

Supported by:

- Construction imagery
- Drone footage
- Key milestones
- Phase-wise development
- Current project status

This directly addresses the client's request and the audit's recommendation to keep project status current.

PAGE 2 : PATH GROUP

Aesthetic & Experience Direction:

This section should establish PATH Group as the credibility and experience behind Path Logicity, using a strong, established visual language with real infrastructure imagery, a concise timeline and large highlight numbers. The design should feel more editorial and legacy-led than the dynamic Logicity sections, while retaining the same navy, green and yellow visual system for continuity.

Path Group Highlights

- **30+ Years** of infrastructure experience
- **18 States** with a pan-India presence
- **70+ Locations** across the country
- **~6,100+ Workforce**
- Experience across **infrastructure, highways and logistics**

About PATH

Introduce PATH Group through a concise brand story:

> **With nearly three decades of experience in building India's infrastructure, PATH has evolved from developing critical infrastructure to creating integrated logistics ecosystems for the future.**

The section then creates the transition:

FROM BUILDING INFRASTRUCTURE

TO CONNECTING INDIA'S SUPPLY CHAINS

PATH LEGACY → PATH LOGICITY

KNOW MORE ABOUT PATH →

PAGE 3: The Logicity Advantage

Aesthetics:

This section should shift from storytelling to exploration and functionality. Use a darker map/infrastructure-inspired visual system with interactive diagrams, route lines and large photography. Information should be presented through short statements, specifications and benefits, rather than long paragraphs. The project should remain the hero, with solutions positioned as the infrastructure capabilities that make the ecosystem valuable.

ONE HUB. EVERY ROUTE.

PROJECT AT A GLANCE

- **~400 Acres** of integrated logistics infrastructure
- **~5.2 Mn sq. ft.** of Grade-A warehousing
- **~1.76 Mn sq. ft.** of commercial space
- **~40 Acres** dedicated to a state-of-the-art rail terminal
- **6 Railway Sidings** enabling seamless multimodal movement
- **~0.78 Mn sq. ft.** of customs-bonded infrastructure
- **Phase 1 | 138 Acres** — the first step towards a larger logistics ecosystem

Interactive Icons to highlight the features

PM Gati Shakti

Driving India's vision for integrated and efficient logistics.

Aesthetic & Experience Direction

This section should feel strategic, future-focused and nation-building in its visual language. Use maps, multimodal connectivity graphics and infrastructure imagery to showcase how Path

Logicity aligns with India's larger logistics transformation agenda. A combination of route networks, movement lines and data-led visuals can help communicate scale, connectivity and economic impact.

Path Logicity & PM Gati Shakti

As one of India's largest multimodal logistics hubs, Path Logicity aligns with the vision of **PM Gati Shakti**, the Government of India's initiative to create integrated infrastructure and seamless multimodal connectivity across the country.

By bringing together **road, rail, warehousing, commercial infrastructure and an Inland Container Depot (ICD)** within a single ecosystem, Path Logicity supports the movement of goods more efficiently, helping reduce logistics costs, improve turnaround times and strengthen supply chain resilience.

Strategically located at Dobbaspet, Bengaluru, the largest MMLP zone, the development is designed to enhance connectivity between industrial corridors, manufacturing hubs, ports and markets, contributing to faster economic growth and improved logistics efficiency.

Contributing to India's Growth Story

- Strengthening multimodal connectivity through integrated infrastructure
- Supporting the PM Gati Shakti vision of seamless logistics movement
- Enhancing supply chain efficiency and reducing transit bottlenecks
- Enabling faster movement of goods across key economic corridors
- Creating infrastructure that supports industrial growth and investment
- Contributing towards a more connected, competitive and future-ready India

The Impact

A logistics ecosystem designed not just for businesses, but for the future of India's economic growth and infrastructure development.

AMENITIES

Everything your business needs. And more.

- **Truck Facilities** — Thoughtfully designed spaces that prioritize driver comfort, safety and well-being.
- **Food & Retail** — A vibrant mix of conveniences that bring everyday essentials closer to the workforce.
- **EV Charging** — Infrastructure built to power the next generation of mobility.

- **Fuel Station** — Reliable fuel access designed to keep business moving without pause.
- **Vehicle Repair & Service** — Comprehensive support facilities that minimize downtime and maximize productivity.
- **ATMs & Essential Services** — Essential conveniences seamlessly integrated into the logistics ecosystem.

- **Green & Open Spaces** — Designed to bring nature into the logistics ecosystem, fostering well-being, balance and sustainable growth.

This could be a scroll of actual pictures of the site and the amenities mentioned above

---

SOLUTIONS :

An interactive connectivity map showcasing:

ROAD — NH 648 | NH 48 | STRR
RAIL — 6 railway sidings
AIR — Kempegowda International Airport
PORTS — Mangalore | Chennai

Users should be able to select a destination and explore the **route, distance and mode of connectivity**.

The audit recommends replacing the existing static map screenshot with an interactive map.

PAGE 4 : SUSTAINABILITY

Aesthetics:

This section should introduce a more benefit-led and contemporary visual language, using oversized typography, animated statistics and clean iconography. ESG should not look like a separate "green" page; instead, it should demonstrate how infrastructure, efficiency and sustainability work together. Use Logicity green as the dominant accent here, supported by navy and neutral backgrounds. Real imagery and verified data should take precedence over generic sustainability graphics.
We highlight

---

01 | ESG

Showcase the sustainability story through:

IGBC PLATINUM PRE CERTIFICATION (This needs to be highlighted)
SOLAR ENERGY
RAINWATER HARVESTING
WASTE MANAGEMENT
EV INFRASTRUCTURE
RESOURCE EFFICIENCY

The current website already references several of these initiatives, but the redesign should turn them into a stronger, more visual ESG narrative.

The story:

More efficient infrastructure → smarter logistics → more sustainable growth

Use verified project-specific data wherever available rather than making unsupported environmental claims.

---

02 | INFRASTRUCTURE THAT DELIVERS BUSINESS VALUE

Move from communicating **features** to communicating **advantages**, could be presented in icon form.

FASTER TAT

Integrated infrastructure designed to streamline movement and handling.

LOWER LOGISTICS COST

Multimodal connectivity and integrated facilities designed to improve supply-chain efficiency.

FASTER CONNECTIVITY

Strategic access to highways, rail and major economic centres.

GREATER OPERATIONAL EFFICIENCY

Multiple logistics capabilities within one connected ecosystem.

SCALABILITY

Infrastructure designed to evolve with business requirements.

MOVING BUSINESS FORWARD. RESPONSIBLY.

PAGE 6 - NEWS

PATH LOGICITY IN THE NEWS

A dynamic section featuring:

News | Media Coverage | Project Updates | Events

Include:

- Publication/source
- Date
- Headline
- Featured image
- Read more

This also addresses the client's request for news/media and the audit's observation around empty update cards.

PAGE 7 - BLOGS

FINAL CTA (FOOTER for all pages)
